## HOW ONESTREAM WORKS

We designed OneStream with you in mind

## LOOK INSIDE ONESTREAM

See what OneStream can do for you

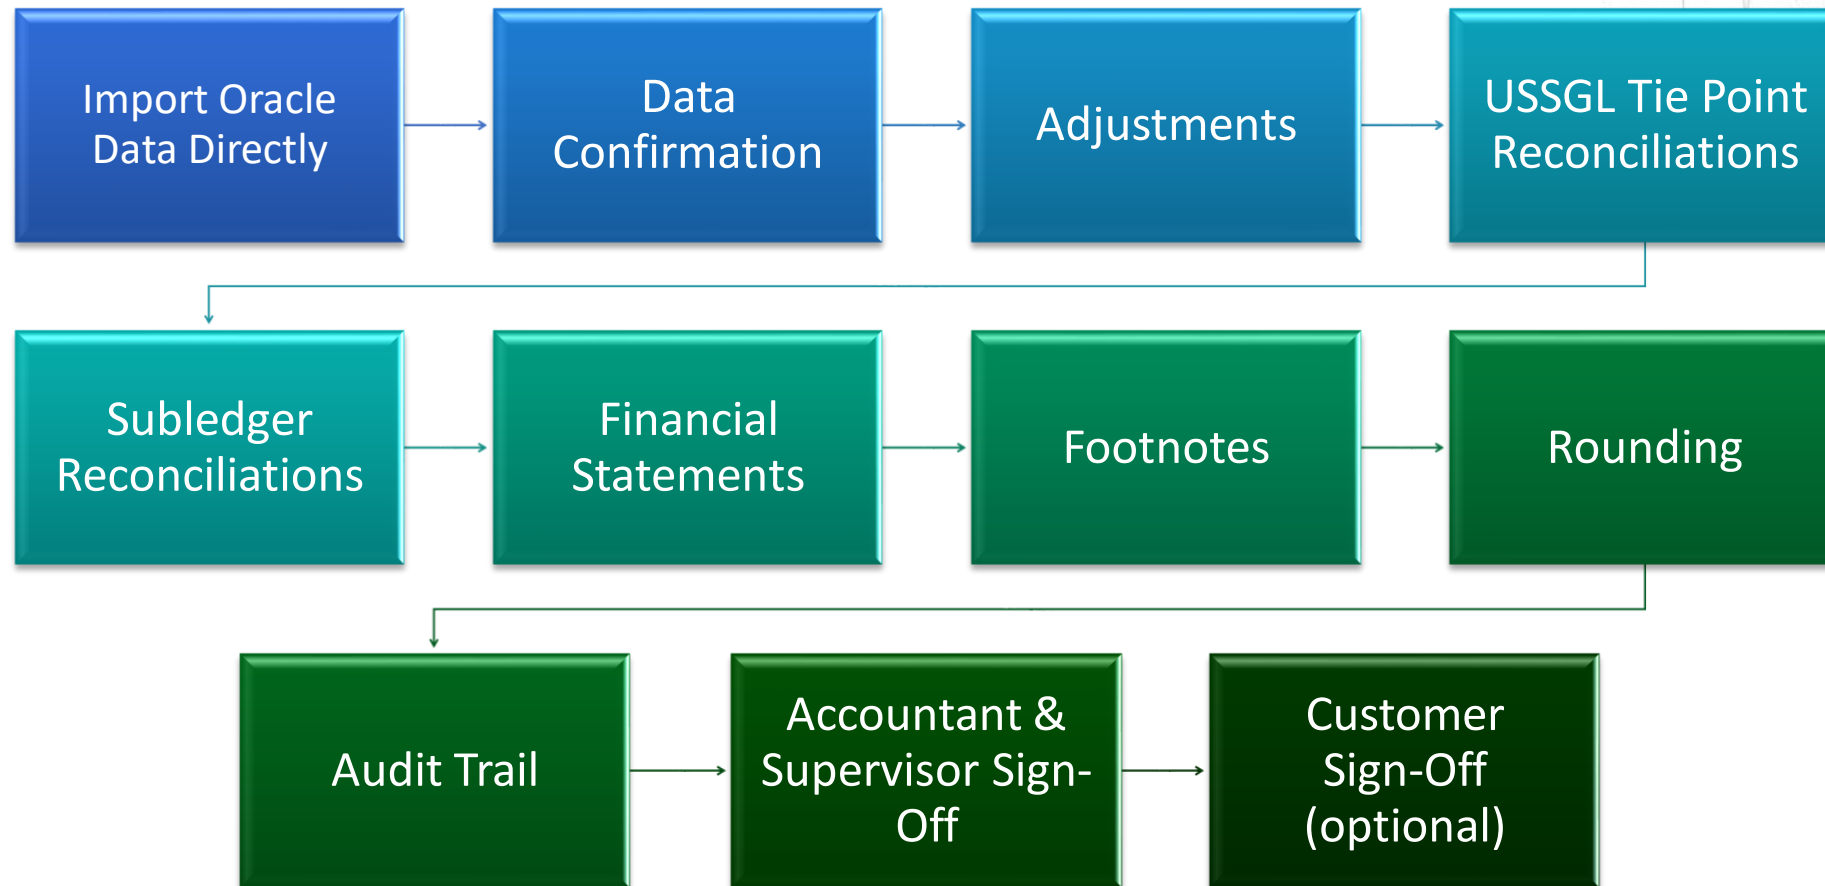

# BACKGROUND

With OneStream, ARC is implementing a **comprehensive cloud-based solution** to replace an Excel-based solution for producing financial statements, footnotes, and supporting reconciliations.

OneStream planning and implementation for HUD began in 2017. We are now **transitioning 40+ ARC customers** into the Global Standard Model (GSM) application.

# GET PREPARED FOR G-INVOICING

## BACKGROUND

The purpose and benefits of G-invoicing, and the mandate behind it

## HOW TO BE G-INVOICING READY

System features and enhancements, readiness and support activities, and a system readiness checklist

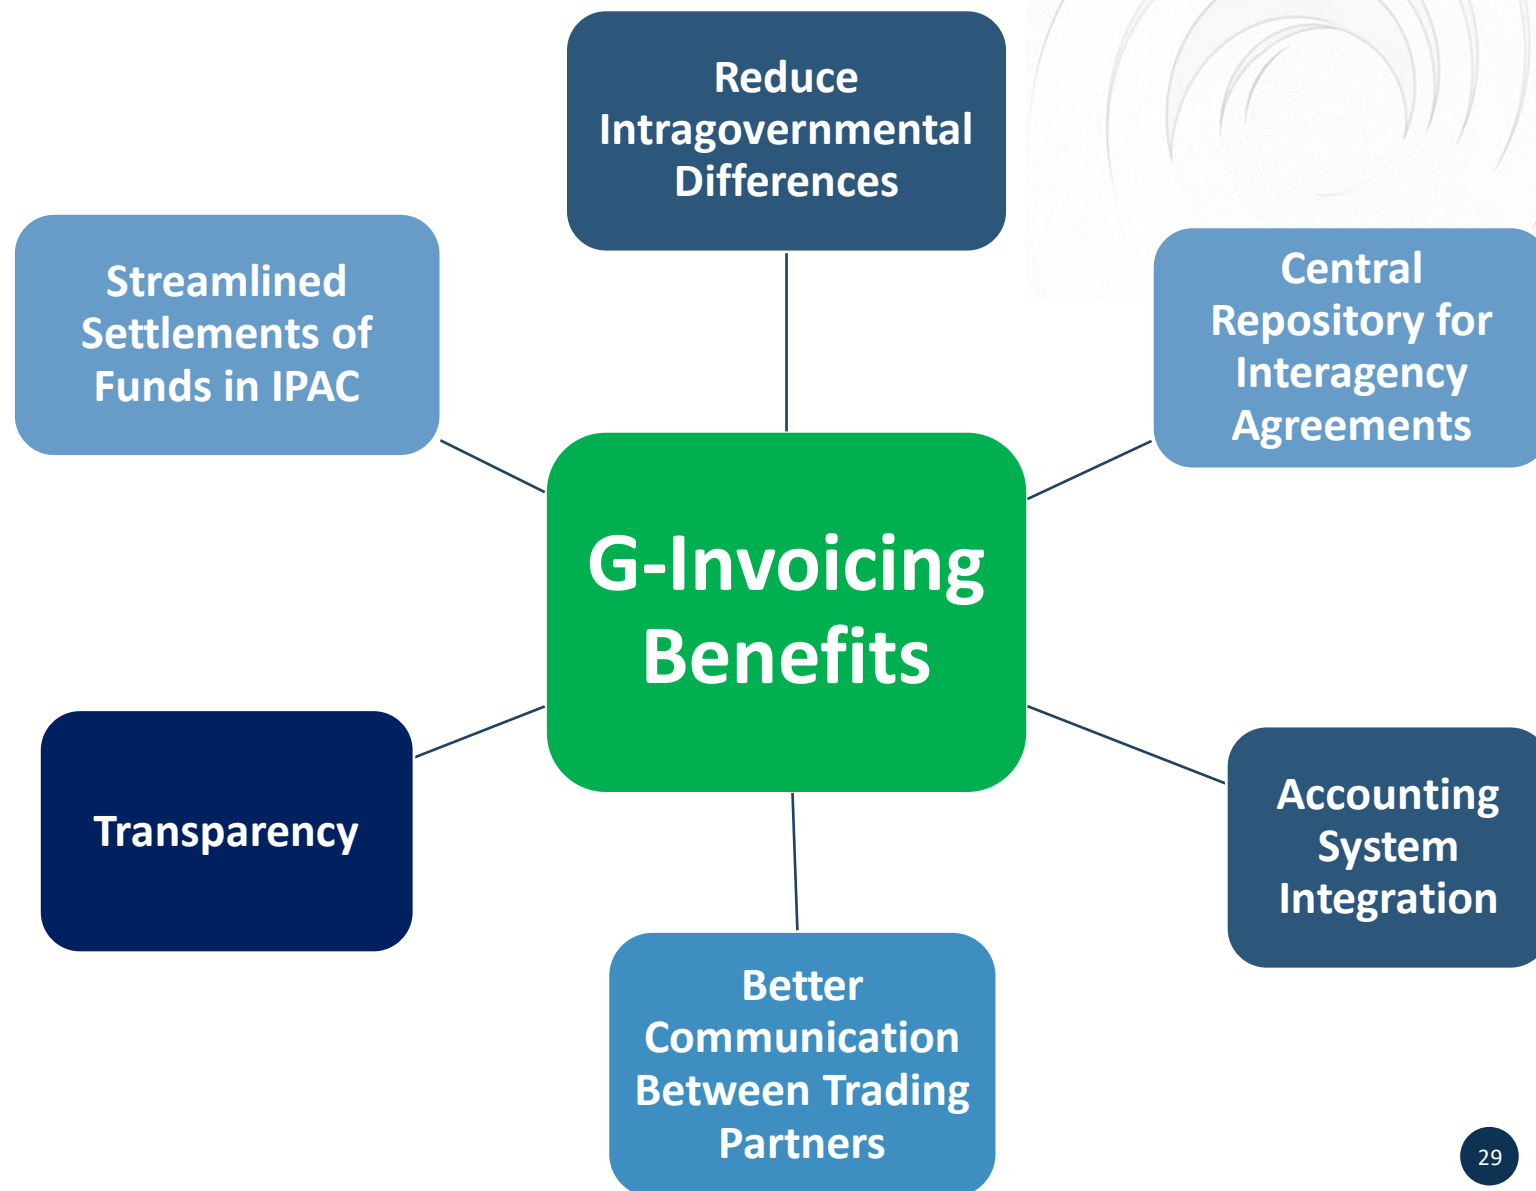

## RESOURCES

References materials and points of contact

# THE PURPOSE AND BENEFITS OF G-INVOICING

## What is G-Invoicing?

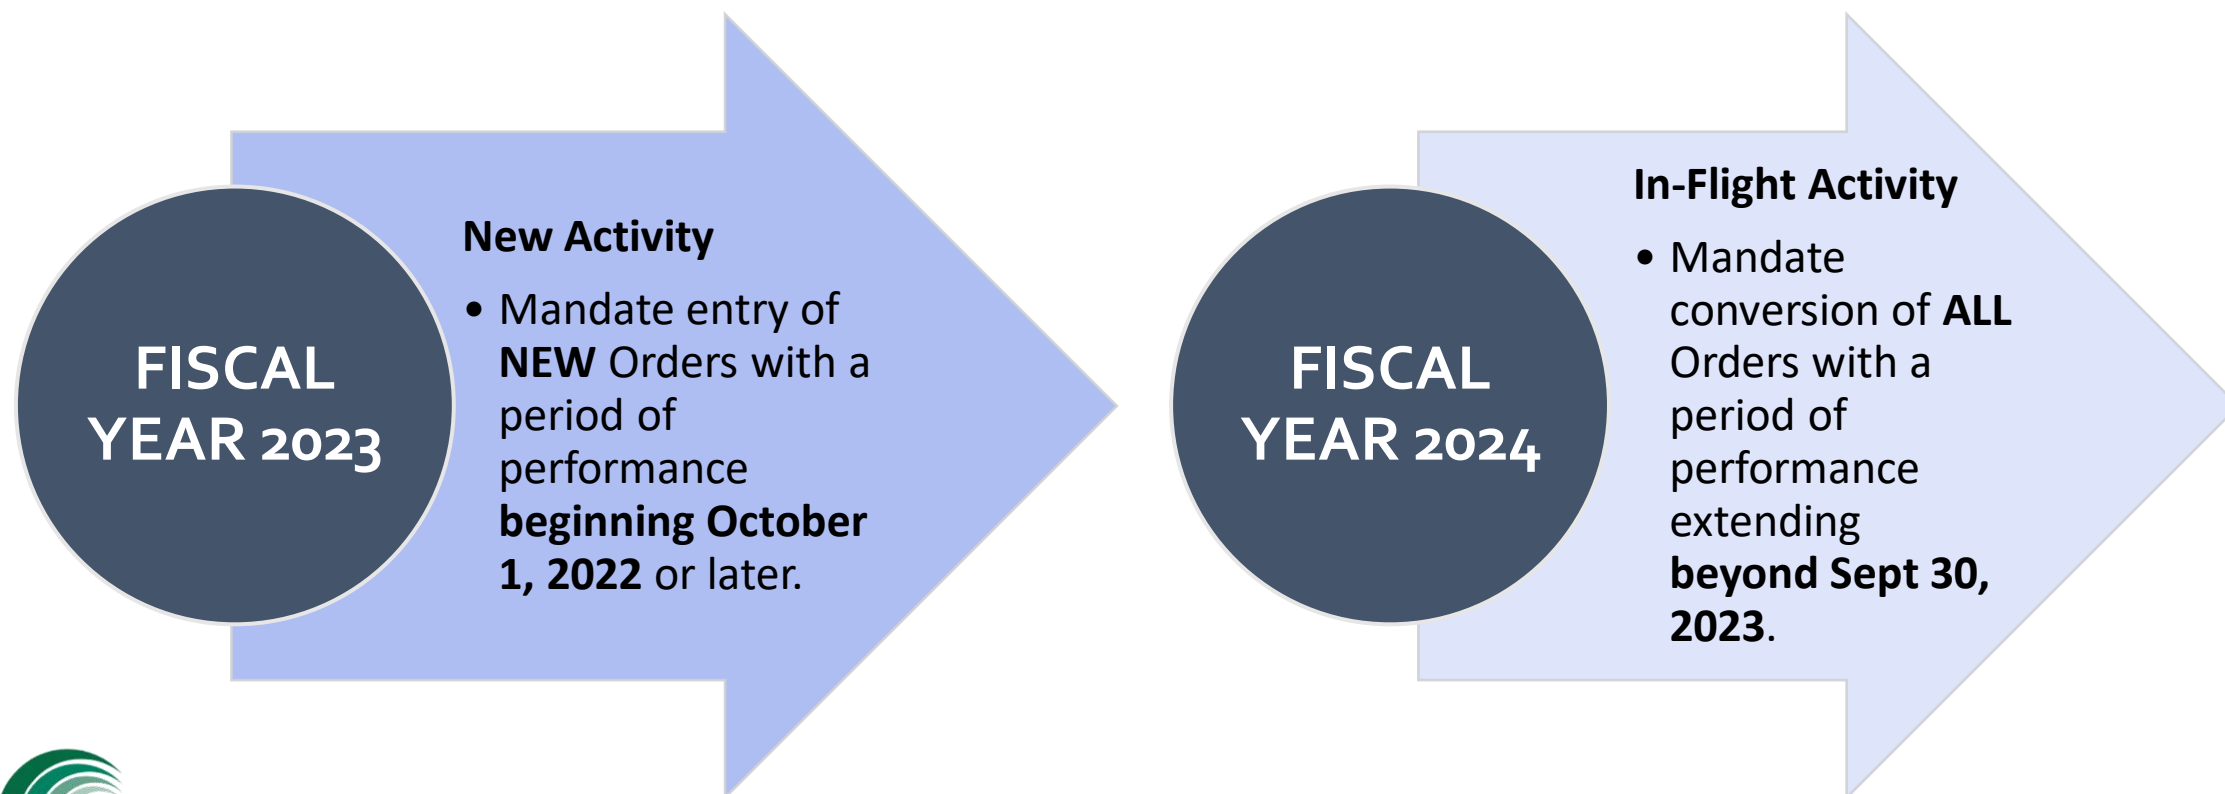

G-Invoicing is the long-term solution for Federal Program Agencies to manage their Intragovernmental Buy/Sell Activity.

# IMPLEMENTATION MANDATE

## Treasury Financial Manual (TFM) Chapter 4700 – Appendix 8 (*Published June 2020*)

- Mandated that all Federal Program Agencies (FPAs) who process Intergovernmental Buy/Sell transactions must implement G-Invoicing.

# SYSTEM FEATURES AND ENHANCEMENTS

## Currently Available

- Full General Terms & Conditions (GT&C), Order, and Performance/Settlement functionality.
- Seller Facilitated Order (SFO) – Servicing Agency can initiate the Order.
- GT&C workflow for initiating agency.

## Future Items

- GT&C workflow for receiving agency.
- Order workflow.
- G-Invoicing and Financial System Integration – ARC anticipates testing full system integration before the mandate date.

# READINESS AND SUPPORT ACTIVITIES

Both ARC and our Customer agencies have certain activities that need to be done in order to be G-invoicing ready.

## Customer Readiness Activities

- Conduct internal meetings to identify users and their roles.
- Ensure every account structure is accurate, and each group has users assigned.
- Have users participate in training.
- Work with trading partner to determine when to enter a specific Interagency Agreement (IAA) into the system.

## ARC Support Activities

- Assist in new account creation.
- Complete administrative functions, such as user creation and org structure modification.
- Continue to provide training to users.
- Assist in submitting Implementation Plan and Attachment A updates
- Address customer questions.

# SYSTEM READINESS CHECKLIST

Use this checklist provided to ensure your agency is ready for G-Invoicing.

- ☐ Complete onboarding spreadsheet.
- ☐ Identify/approve account structure.
- ☐ Assign users to roles within each routing group.
- ☐ Submit completed user forms for all identified users.
- ☐ Ensure users have attended training.
- ☐ Perform a test IAA in G-Invoicing to ensure processing flow is accurate.

If you are unsure on your agency's status, reach out to **ARCGINV@fiscal.treasury.gov**.

# IMPROVING ACQUISITION SUPPORT THROUGH FORECAST MODELING

## BACKGROUND

Using open data to help you track procurement activities

## APPLIED ANALYTICS WITHIN PROCUREMENT

Collect, Analyze and Visualize the data

## RESOURCES

Where to go for more information

# APPLIED ANALYTICS WITHIN PROCUREMENT

In 2018, ARC estimated customer activity using historical procurement data for similar size customers. This manual process was limited in the ability to analyze trends in customers' procurement behavior and the ability to develop predictive analytics for new and prospective customers.

## Follow the Data!

The government has tons of open data that can support effective decision making.

A Bureau of the Fiscal Service open data website, USASpending.gov, is a great source to find federal spending data. To foster innovation, ARC leveraged USASpending.gov to develop a forecast model that helps customers plan for procurement activities over the next 12 months!

# OUR PROCESS: *COLLECT, ANALYZE AND VISUALIZE* THE DATA

Yes, it's that simple!

**For this process to work, you'll need some key ingredients:**

- A **culture** that supports exploratory research (Test & Learn)
- **Expertise** into professions that generate subject data
- **Drive** to improve customer experiences

# COLLECT: GATHERING DATA

Example: Raw Data subset from  
USAspending.gov

**Benefit:** Though advanced data analytics, ARC created cost drivers to help determine the resources and requirements needed for customer procurement transactions. These cost drivers are now in the customer agency service agreement and support Procurement leaders in balancing priorities and personnel resources.

# VISUALIZE: USING DATA TO TELL *YOUR* STORY

**Benefit:** Using federal spending data, ARC developed a forecast model that identified monthly transaction volumes, level of complexity, and the time needed to complete agency procurement activities. ARC's detailed analysis is provided as a monthly report to existing customers and is available for prospective customers.

# DIGITAL END TO END EFFICIENCY (DEEE)

A framework to **assess and transform business processes**. It includes methods and tools to optimize processes by **identifying pain points and determining the right solutions** to mitigate or eliminate them.

## Key Tenets

### End-to-End Process Focused

DEEE looks at the entire process to understand the full opportunity, starting from the provider all the way down to the customer and end user.

### Customer Focused

DEEE evaluates the customer experience (CX) alongside the business process, gaining more insights and a deeper understanding of the customer and employee needs.

### Repeatable

DEEE is packaged into a playbook with actionable steps, tools, templates, and leading practices to enable any agency to apply the framework to any process.

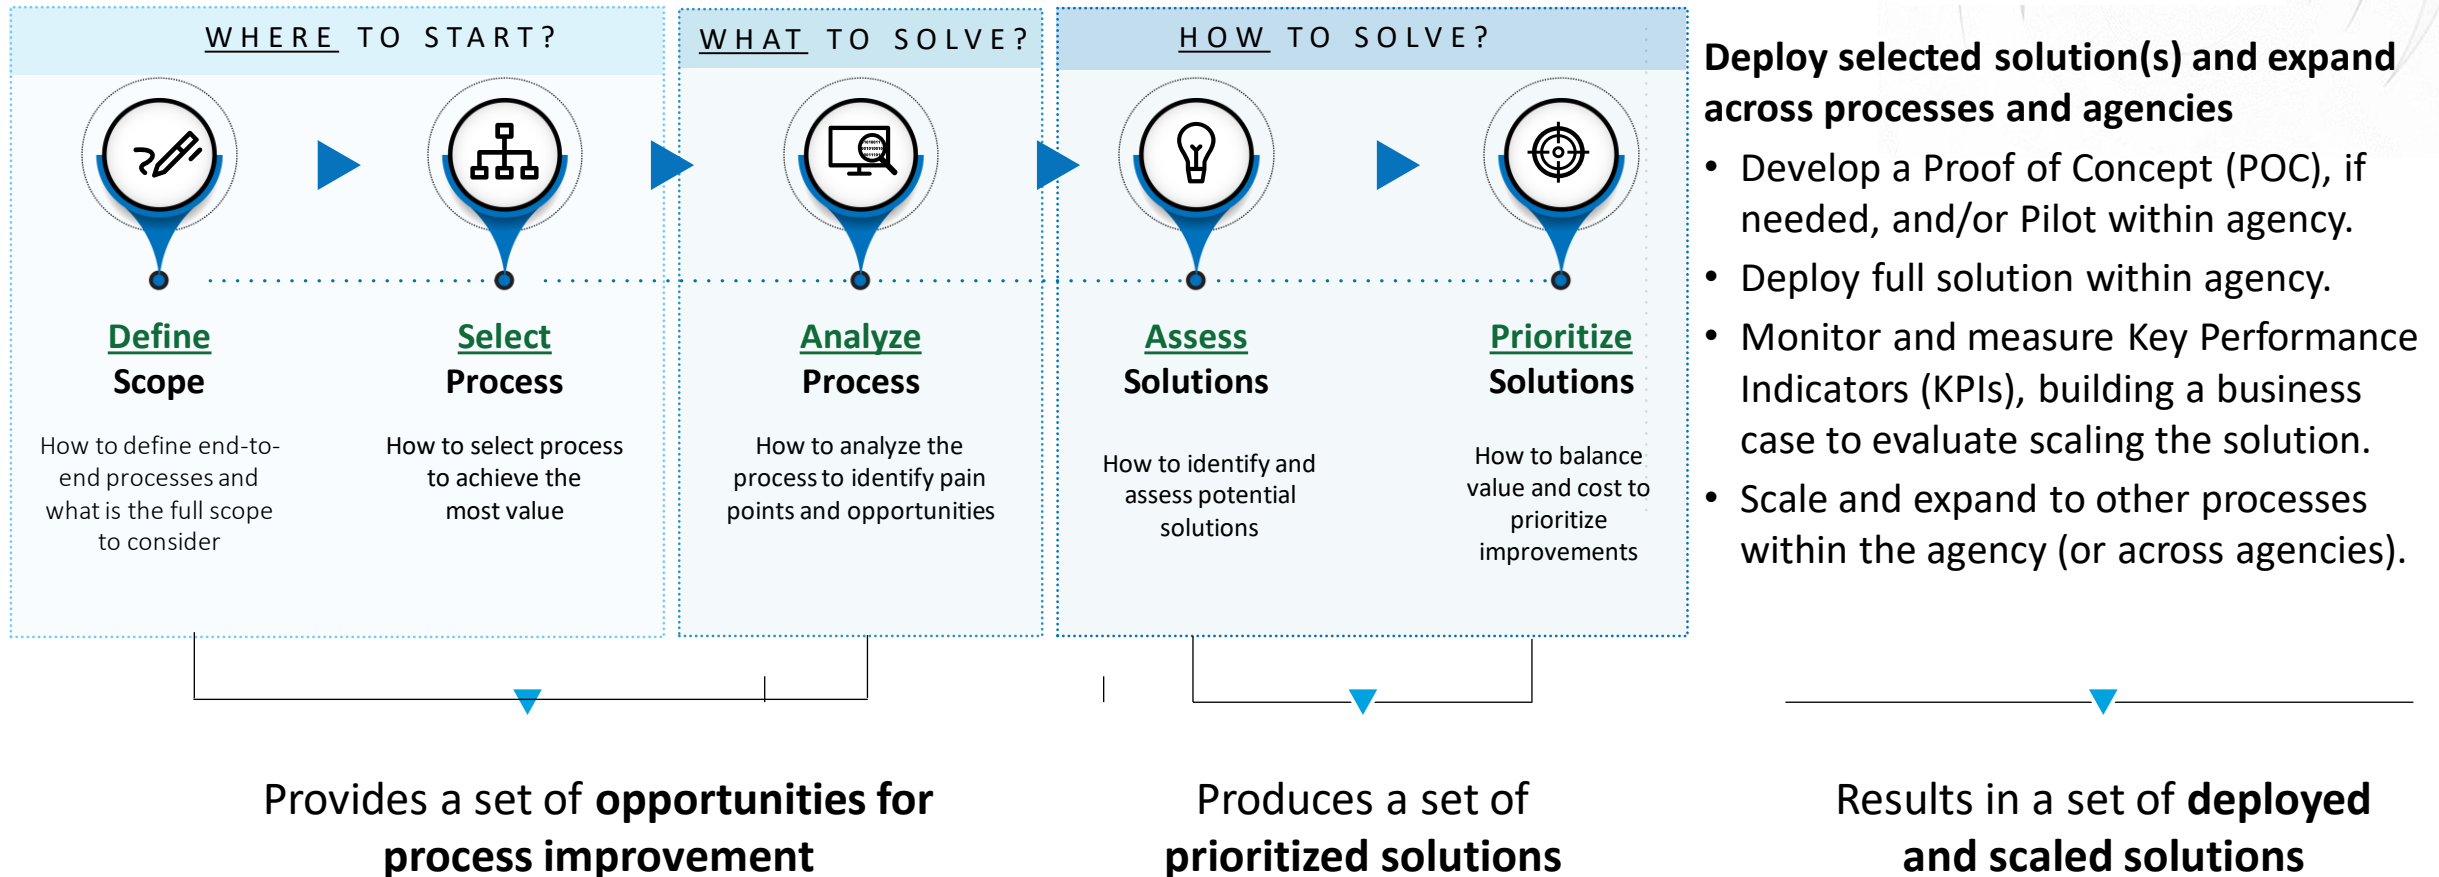

### Scalable

DEEE will look at opportunities and solutions that will drive the most scalable transformation for the enterprise and government-wide.

# OUR FRAMEWORK

DEEE

Implement & Scale

# WHERE TO START: SELECT PROCESS

There are 11 Government-Wide End-to-End (E2E) Business Processes:

First crosswalk processes to standard definitions

Then Apply criteria to a select processes to analyze:

Criteria for Efficiency Gains

Transactional (vs. Analytical)

High Volume

More Manual

Many Staff Members

# WHAT TO SOLVE: ANALYZE PROCESS

## Human Centered Design

Who are my users? What do they do? Why do they do it?

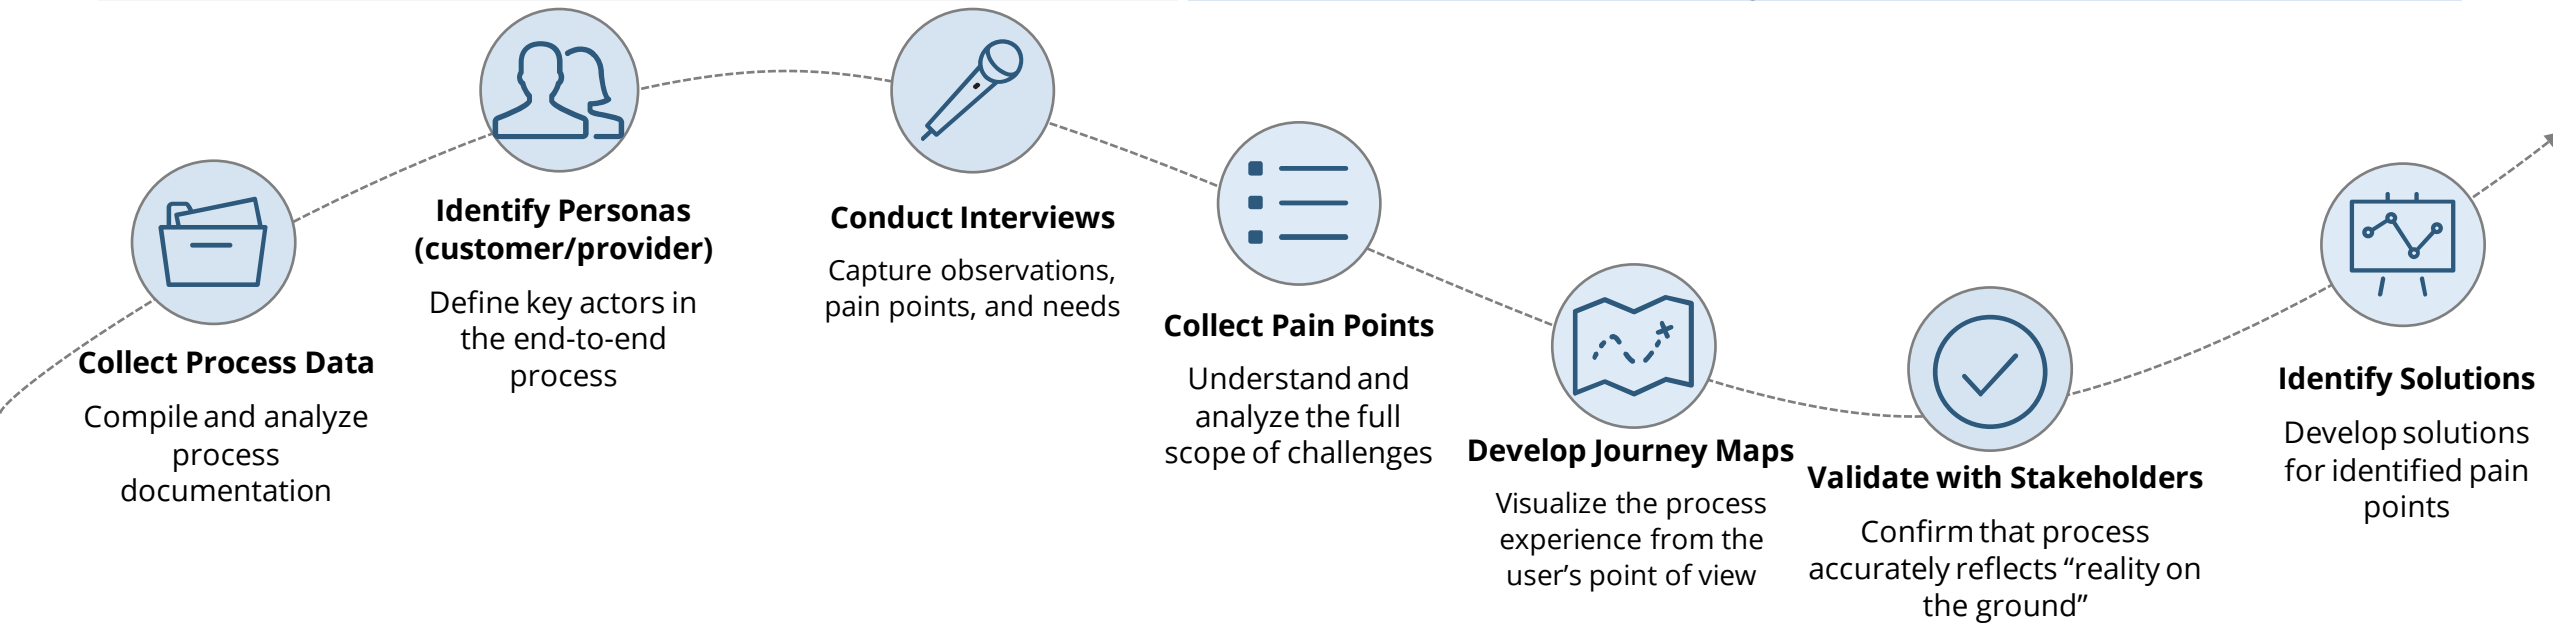

- Apply techniques focused on collaboration, conversation, and engagement from all agency participants

## Technical Process Analysis

What is the documented process?

- Identify and examine process documentation
- Collect summary data and existing analysis on major challenges

# ASSESS SOLUTIONS

To help think through the potential solution set for a given pain point, **DEEE divides solutions into three solution categories with varying level of cost and technical advancement:**

**Reduce/Optimize:** Eliminate cumbersome process steps and streamline

**What it is:** Reduce unnecessary activities considering whether the way business is done today is how it needs to be done (including policy changes to enable process changes or trainings, etc.)

**Investment:** Low to no cost (non-technology solution)

**Digitize:** Move from manual to systematic or automated processes

**What it is:** Apply digital technology to automate/eliminate manual steps, reduce paper-based steps, and streamline the process

**Investment:** Limited cost (often using existing technology or capabilities)

**Innovate:** Transform digital capabilities with intelligent automation

**What it is:** Apply new and emerging technologies to transform business processes and unlock long-term efficiency gains

**Investment:** Variable cost (may include net new investments)

# BENEFITS TO ARC CUSTOMERS

A large circular inset on the left side of the slide shows a man and a woman sitting on red, modern-style chairs. The man, on the left, is wearing a dark blue suit and is looking towards the woman. The woman, on the right, is wearing a light-colored blazer and dark pants, and she is holding a tablet computer. They appear to be in a professional meeting. The background of the inset is a light, textured surface.
