# ARC MONTHLY BULLETIN MARCH 2022
*Valuable Information for ARC's customers*

## HEADLINES

**General:**
1. oneARC Portal Launches March 29th
2. Unique Entity Identifier (UEI) Update

**Human Resources:**
3. Spring webTA Timekeeper Refresher Training

## FULL STORIES

### 1. oneARC Portal Launches March 29th

ARC has successfully completed the oneARC Portal User Acceptance Testing (UAT) for the Financial Management Budget lifecycle. We had 36 testers from eight different agencies participate with 907 total scripts executed. Thank you to everyone who participated in UAT.

Starting March 29, 2022, customers who participated in UAT and ARC employees will begin processing live transactions within the oneARC Portal. We will roll out this functionality in the Spring of 2022 to the rest of the Budget customers following this initial Go-Live.

Employees and customers have long told us they need a better way of engaging with each other – one that is more modern, efficient, experience-driven, and user-friendly. The oneARC Portal is an exciting step forward for ARC shared services and provides more transparency, easier tracking with self-service options, and less manual work.

**Functionality Included in the Phase 1 Go-Live:**
- Budget Appropriation, Apportionment, and Allocation Request Processes
- Delegation of Authority (DOA) and Authorizations
- Dashboards and Reporting
- oneARC Portal Help Center Support
- Other application features such as account management and notifications

You can expect additional FM and other service line functionality will be built and deployed to customers and employees. Timelines will be communicated on a regular, iterative basis.

ARC is maintaining open lines of communication with the Bureau's Information and Security Services regarding the current threat landscape and will adjust the go-live date as needed.

Contact Jacob Oberlin at Jacob.Oberlin@fiscal.treasury.gov if you have additional questions.

### 2. Unique Entity Identifier (UEI) Update

ARC plans to implement UEI in Oracle, PRISM, and other subsidiary systems now on March 13, 2022. During implementation ARC staff will populate the UEI field at the supplier site level for all active suppliers as well as interface the UEI to appear in PRISM. UEI will be used as the supplier number for new suppliers requested by customers starting on March 14, 2022. Existing supplier numbers will not change. OBI users who have built custom reports utilizing the DUNS or DUNS+4 data elements will need to edit those reports to pull in the new UEI value instead. All standard (SAR) reports will be updated to include UEI.

An FAQ document has been posted here:

Contact Jennifer Dickerson at Jennifer.Dickerson@fiscal.treasury.gov or Nathan Bumgarner at Nathan.Bumgarner@fiscal.treasury.gov if you have additional questions.

3. **Spring webTA Timekeeper Refresher Training**

The HRSystems Branch offers webTA system refresher timekeeper training every spring and fall to our Human Resource customers. This is an opportunity for customers new to the timekeeper role to receive instruction in using webTA and also serves as refresher training for more experienced timekeepers. Virtual spring refresher training sessions have been scheduled on the following dates with both morning and afternoon sessions available. Designated webTA Human Resources contacts and timekeepers will receive an email within the next few weeks informing them how to sign up for a class.

March 22nd – 10:00am to 12:00pm (Eastern Time)
March 24th – 4:00pm to 6:00pm (Eastern Time)

Please contact Dianna.Wilson@fiscal.treasury.gov if you have any questions.
